# HIMALAYAN ACCESSORIES

## HIGH BAY OPTIONS

HB-XXX-18Y-PAD

HB-XXX-LOOP

## MOUNTING OPTIONS

All units come with 2 v-clips for dual point chain or cable mounting. Additional mounting hardware is available. Units below ship as an accessory to fixture.

- Aircraft cable kits are available featuring a Kwik Lock that adjusts to the 1/16 in galvanized cable with out the need for additional tools. Available lengths are 60, 120, 150 inches.
- Loop sets go over the supporting structure and create a loop with a sleeve connector. The other end connects to the fixtures V-clip with the use of the Kwik Lock.
- Paddle sets attach directly to the fixture through holes in the back of the housing. Paddle sets are the most secure mounting method and are the preferred for gymnasiums.
- HB-XXX-18Y-PAD - Paddle system. XXX designates length
- HB-XXX-LOOP - Loop system. XXX designates length

- MALLEABLE HOOK**  
Malleable Hook with 3/4" NPT Threads. Must select Extra Ballast for 2, 3, & 4 lamp units.

- HUB 3/4 CONDUIT**  
Conduit hub for 3/4" pendant. Must select Extra Ballast for 2, 3, & 4 lamp units.

- FIXTURE MOUNTING BOX**  
A junction hub box that is designed to screw on to the back of the fixture for added stabilization. It can be mated with a pendant, hook, or hub (sold separately).

- SWIVAL BRACKET**  
Ceiling mounted ball joint swivel for 3/4 pipe.

- SURFACE MOUNT BRACKET**  
Custom designed bracket kit to surface mount 4ft Himalayan fixtures to ceiling while leaving a 2" space above the fixture.

- STABILIZATION BRACKET**  
Provides added stability when pendant mounting. Attaches to the side of the center ballast channel. Kit comes with mounting screws.
