

FLANGE KIT

Installation Guide

WARNING

1. To avoid electric shock, disconnect power at source prior to installation
2. The installation should be performed by qualified electricians or lighting technicians.
3. Before conducting any installation, maintenance, or removal, disable all power to the luminaires and wait until fixture cools down.
4. DO NOT touch the fixture while it is in service.
5. If there are any problems with the fixture, TURN OFF the power and DO NOT attempt to repair unless you are a qualified technician or the customer service member.

FLANGE KIT RECESSED

Flange kit specifications are subject to change without notice.

1. Slide (Snap-Lock) Corner angles into side and end/intermediate rails as shown.
2. Place assembled frame into ceiling opening and wire support (at four corners as shown) from main floor/ceiling structure.

Flange kits are designed to be used with any grid type recessed luminaire in ceiling requiring flanges. May be nailed to framing for purpose of trimming out the ceiling opening not to be used for support of luminaire. If this method of installing the flange kit is used, luminaire must be supported by #12 GA. mild steel wire by others.
