## FEATURES

- Highly configurable strip light with 2', 4', and 8' sizes, 1.9" width, and suspended, surface, wall, or pendant mounting options, including continuous row capability.
- Steel housing with a white powder coat finish and a high-transmission frosted acrylic lens for uniform illumination and modern style.
- Offers field-selectable or factory-set lumen output (2,000–12,000 lumens) and field selectable CCT options (3500K, 4000K, 5000K) to adapt to various applications.
- Integrated wireless controls and a 0–10V dimmable driver (100%–10%) for maximum energy savings.
- Supports 120–277V universal voltage and factory installed battery backups (5W–10W).
- High efficacy of up to 162 lm/W and >80 CRI with a calculated L70 > 100,000 hours, backed by a 5-year standard warranty (optional 10-year warranty).
- DLC® qualified and ETL listed, backed by a 5-year standard warranty (10-year optional)

## SUITABLE APPLICATIONS

- Education
- Retail
- Schools
- Hallways
- Manufacturing Facilities
- Healthcare
- Warehouse
- Grocery Store
- Distribution Centers

## CERTIFICATIONS

## SPECIFICATIONS

### CONSTRUCTION

Steel housing body with a white powdercoat finish, for rigidity, durability, and ease of installation. Designed for both functionality and aesthetics, providing reliable performance without compromising on style.

### ELECTRICAL

Class 2 LED light engine for high efficacy and long life. Calculated L70 > 100,000 hrs. LED Lumen Maintenance Estimates based on TM-21 projections for the light source at 25° C ambient. Power Factor > 0.90. Standard 120-277 Vac 0-10V dimmable (10%-100%). Optional emergency battery backups available to meet critical life safety lighting requirements. Lumen and CCT Selectable fixtures allow for ease of adjustment with switches located on top side of driver. Lumen Selectable fixtures ship at the highest lumen output. CCT Selectable fixtures ship at 4000K.

### INSTALLATION

Designed for a variety of mounting solutions including surface, wall, pendant and suspended. The fixture can be mounted in continuous rows. Factory installed cord options. See page 3 for additional detail. Knockouts mounted on back of fixture for electrical access and mounting.

### OPTICS

High Transmission field-removable lens design, allowing for easy access to drivers and other internal components for maintenance purposes. Simplifying maintenance procedures, minimizing downtime and ensuring minimal disruption to the space.

### CONTROLS

Factory installed Basic Sensor options available to maximize energy savings. Sensors are installed off the end cap of the fixture. Please see more information below on Page 3. Inquire with manufacturer for additional controls options, including customer supplied items.

### CERTIFICATIONS

ETL Listed to US and Canadian safety standards. Suitable for damp locations. Title 24 Compliant with sensor option; see local ordinance for qualification information.

### WARRANTY

5 Year Warranty Standard; 10 Year Warranty Optional ([Terms and Conditions apply](#)).

## FOOTNOTES

<sup>1</sup> Not available with SS2 models

<sup>2</sup> Sensor mounted off end cap of fixture, not suitable for continuous row mounting

<sup>3</sup> Not compatible with end mounted sensors

<sup>4</sup> One required per 4ft section

<sup>5</sup> Used to align fixtures mounted in continuous rows. One needed between each fixture

<sup>6</sup> Not compatible with Emergency Battery Backup Options

<sup>7</sup> Contact factory for more details

<sup>8</sup> Adds 3 inches to nominal fixture length. See line drawings for more detail.

<sup>9</sup> Must be ordered with dedicated Lumen Output

<sup>1</sup> Values are nominal, check IES file for more detail

<sup>2</sup> Electrical data at 25°C (77°F). Actual wattage may differ by +/-10%.

## BASIC CONTROLS OPTIONS

### FIOS

Standard on/off motion sensor that provides 360° detection of motion from 8 to 20 ft mounting heights.

### BDxx

Factory set Bi-Level Dimming. Sensor is set to dim level, as indicated in the "xx" portion of the part number, when the area is unoccupied. Example: BD20 sets the fixture to dim down to 20% lumen output when the area is unoccupied. Once motion is detected, the fixture will return to 100% light output.

### DHPC

Daylight Harvesting off photocell. Fixtures will continually dim up/down throughout the day based on light level readings taken from the photocell control.

### USBD

User Selectable Bi-Level Dimming. Allows the end user to manually select the unoccupied dimming level. Once motion is detected, the fixture will return to 100% light output.

### BDxxPC

Factory set Bi-Level Dimming with motion and photocell. Sensor is set to dim level, as indicated in the "xx" portion of the part number, when the area is unoccupied and will not return to 100% light output unless 1. motion is detected and 2. the light level is below the preset level. Example: BD20PC sets the fixture to dim down to 20% lumen output when the area is unoccupied and will not return to 100% light output unless the above conditions are met for both motion and light level readings.

## ADVANCED CONTROLS OPTIONS

### NUROAir by ILLUMUS

#### NURO

NUROAir Integrated Bluetooth Sensor is the optimal groupable controls lighting solution. With main features such as PIR Motion Sensing, Occupancy/Vacancy, Bi-Level Dimming and Daylight Harvesting - this flexibility makes the NUROAir Integrated Sensor ideal for tailoring lighting to specific space needs, optimizing both ambiance and efficiency. The NUROAir App, available for download on iOS and Google Play Store, offers a user-friendly interface for automatic or manual customization of your space. Through the app, users can configure sensor settings such as the Light Output, CCT, Hold Time, Standby Time/Level, High/Low End Trim, Background Light Level, Set Schedules, and Control Lighting Groups or Zones, all from a mobile or tablet device. Manual control is also available with a range of compatible wireless & wired wall switch options.
