CF SERIES

ILP's feature rich CF Flood Series luminaires are the ideal contractor solution designed to deliver a cost-effective, energy efficient, versatile lighting package for sustained long-term performance. Coming standard with unparalleled high-performance features, the CF series is the ideal product to replace legacy metal halide floodlights resulting in up to 70% in energy savings. With a service life of over 10 years and an efficacy up to 143 lumens per watt, these floods are the perfect solution for a broad range of outdoor lighting applications such as illuminating building facades, signs, flags, or other dark areas.

Unparalleled Standard Features

CF LED floodlights IP66 architectural die-cast aluminum housing comes equipped with an embedded leak-proof electronic photocell with an internal override switch extending luminaire life and allowing dusk to dawn illumination standard out of the box. Every CF LED Floodlight features an internal field adjustable lumen output knob providing easy site tuning for even row illumination or individual fixture dimming to customer site preferences.

Savings Made Easy

CF LED floodlights feature a wide flood (7x6) distribution that can be easily field-swapped with snap-in collimating 5x5, 4x4, & 3x3 distributions for a tighter beam spread. Threaded knuckle, yoke and vertical slipfitter options make installation easy. 4000K and 5000K color temperature options provide flexibility to meet the specific needs of each job site.

Available Colors

Always in Stock

All CF LED floodlights are stocked in all finishes (Black, White, Bronze) in multiple regional warehouses throughout the country and Quick ship within 24hrs of order received.
