BAA Buy American Act **TAA** Trade Agreement Act

ILLUMUS PROUDLY COMPLIES WITH THE BUY AMERICAN ACT

ILLUMUS, powered by GREEN CREATIVE and ILP, has built a reputation for creating consistent and reliable lighting products by hard-working Americans. We continue to serve all our customer's needs with American ingenuity, built by American hands in Sanford, Florida, USA.

The Buy American Act (BAA) of the American Recovery and Reinvestment Act (ARRA) "restricts the purchase of supplies that are not domestic end products, for use within the United States", and uses a two-part test to define a domestic end product:

- The product must be manufactured in the United States
- The cost of the domestic components must exceed 50% of the total cost of components

A good or service is Trade Agreement Act (TAA) compliant if manufactured or substantially transformed in the United States or manufactured in a TAA-designated country.

All the ILLUMUS products listed in this brochure meet the stringent requirements set by BAA under the ARRA act or TAA and proudly bear the logos below on all marketing collateral, making it easy to recognize which products comply. When purchasing a BAA or TAA product, always verify that they are compliant.

HIGH BAYS

Superior performance and durability go hand in hand. Best for production facilities, warehouses, big-box stores, and 24/7 facilities, High Bay lights offer both high lumen output and a robust design. These low-maintenance, high-power fixtures often include sensors and wireless controls, providing additional energy savings.

ENDEAVOUR HIGH BAY (EDV 2.0)

Endeavour 2.0 is the linear high bay of the future. Sturdy - but sleek, it features an aluminum body with curved end caps in white, black or custom finishes to suit even the most unique project aesthetics. Endeavour 2.0 is built to withstand high abuse applications with an IK10 impact rating - the highest impact rating. Endeavour 2.0's uplight option provides enhanced full room illumination, while the high performance narrow and wide distribution optics provide superior horizontal or vertical light levels with excellent uniformity.

ROUND LOW BAY (UFO-LB)

- Visually comfortable illumination
- 10% uplight reduces cave effect
- Sensor & wireless controls ready

INDIRECT HIGH BAY (PHB-TC)

- Inverted mounting for indirect distribution
- 100% glare reduction
- 75,000 – 97,000 lumen packages

GRID FRAME HIGH BAY (GH)

- High performance recessed high bay
- Various lens options for aesthetics
- 2x2' & 2x4' sizes

VAPOR TIGHTS AND KITS

Vapor tights are sealed and gasketed luminaires that are best used in extreme environments. Though these fixtures are often found around wet locations or in freezers and refrigerated areas, they are suitable for any industrial or commercial application where safety and protection are a must.

BLIZZARD HIGH BAY (BL)

BL Series is an industry leading luminaire designed for applications requiring a robust, durable, sealed and gasketed construction for extreme environments. The NSF listed fiberglass enclosure is easy to service and clean, ideal for maintaining a safe environment for food and beverage processing. With an enhanced feature set including industry leading ambient operating temperatures, best in class distribution options, extremely high efficiency, wide lumen range, and multiple mounting options, the BL series is the prominent choice for nearly any high bay application.

NARROW LINEAR VAPOR TIGHT (WTZ)

- Sealed and gasketed vapor tight
- Durable construction for the harshest environments
- 2', 4' & 8' sizes

VAPOR TIGHT HB RETROFIT (BLR)

- Easy upgrade to LED
- Long list of compatible luminaires
- Installs in 4' housing in 5 mins or less

X SERIES VAPOR TIGHT (WTX)

- Sealed & gasketed vapor tight
- Unique light bar technology
- Slim profile 4' & 8' lengths

VAPOR TIGHT RETROFIT KIT (VTR)

- Easy upgrade to LED
- Long list of compatible luminaires
- Installs in 4' or 8' housing in 5 mins or less

TROFFERS AND KITS

The preferred choice for schools, offices, and a variety of commercial applications, LED troffers provide enhanced aesthetics while optimizing energy savings. These sleek, solid-state luminaires are perfect for new construction or retrofit applications.

VOLUMETRIC TROFFER (VOLA)

VOLA is designed for rigidity, durability and ease of installation while providing maximum performance and improved aesthetics. With an exceptionally robust offering of lumen outputs, sizes and options, VOLA is designed for a multitude of applications.

FLAT VOLUMETRIC TROFFER (FLT)

- Flat lens volumetric design
- Delivers smooth uniform illumination
- Tamper resistant design

VOLUMETRIC RETROFIT KIT (LANCE)

- Architecturally designed volumetric troffer retrofit kit
- High efficacy - up to 151 lm/W for enhanced energy savings
- Advanced controls options for asset tracking

DISCOVERY NARROW TROFFER (DNT)

- Sleek, compact and modern troffer
- Slim 4" lens width
- Grid, Flange, Surface & Skylight mounting options
- 1,000 to 12,000 Lumens
- 2', 4', & 8' Sizes

VOLUMETRIC SELECTABLE TROFFER (VST)

- BAA Optional
- Volumetric design
- Lumen & CCT selectable
- 1x4', 2x2' & 2x4' sizes

VOLUMETRIC SELECTABLE KIT (VTK)

- BAA Optional
- Shallow, Lightweight, 3-Piece Versatile Volumetric Selectable Troffer Retrofit Kit
- 1x4', 2x2', & 2x4' Sizes
- 2,000 to 5,000 Lumens

STRIPS AND KITS

LED Strips offer a sleek and versatile solution for new construction or retrofit projects. These fixtures can be mounted in continuous rows or as stand-alone luminaires and are simple to install. Various lengths, features and aesthetics are available, providing optimal flexibility when needed most.

DISCOVERY LINEAR STRIP (DSC)

VARI LINEAR RETROFIT (VLR)

- Highly configurable & adaptable BAA linear retrofit
- 4' & 8' lengths available
- 8 lumen packages ranging 2,000 – 12,000

The Discovery Linear Strip is a highly configurable BAA spec grade strip luminaire. The injection-molded endcap smooth designs have no visible fasteners. The luminaire comes in three sizes (2', 4', 8'), vast lumen range and four different mounting options, catering to your project aesthetics, functionality, and flexibility. Available with a variety of compatible wireless grouping controls in order to cater to your space and maximize energy savings in the way you want.

WRAPS & STAIRWELL

Wrap lighting is perfect for both high-traffic areas like workspaces and common rooms, as well as low-traffic areas such as storage rooms, restrooms, and stairways. These luminaires are ideal for spaces with unique designs or uncommon angles, where operators need to maximize light output in key locations.

CURVED WRAP (SQ)

The SQ wrap’s modern sleek curved profile provides smooth uniform illumination with an enhanced feature set. Maximize scalability with its various lengths, lumen range, controls options and mounting options for surface, pendant and continuous row applications.

CURVED WIDE BASE WRAP (SQWB)

- Covers existing wide wrap footprints
- Suitable for installing in continuous runs
- 2', 4' & 8' lengths

NARROW WRAP (FNW)

- Narrow & sleek 9" width design
- Molded end cap for polished appearance
- 4ft & 8ft lengths

WIDE WRAP (FWW)

- 13" width covers existing wrap footprints
- Molded end cap for polished appearance
- 4ft & 8ft lengths

CAVERN STAIRWELL (CV)

- Specification grade robust design
- Bluetooth programmable ultrasonic sensor
- Emergency integration achieves life safety requirements

DOWNLIGHT & TRACK

Whether drawing attention to products in retail areas or illuminating a lobby or office, choosing the right commercial lighting solution is essential. Downlighting and track lighting solutions provide flexibility in light direction, angles, and dimming options. These luminaires are best for blending superior performance with visual appeal.

NYX NEW CONSTRUCTION

With integrated SelectDrive, SelectKelvin and DualDim technologies, abundant options of field installable accessories, and unique compact design, NYX revives customized downlighting design for any new construction project.

SPECFIT NEW CONSTRUCTION

- Specification grade lighting performance
- Adjustable lumen output up to 5,000lm
- TRUE CHROMA options for superior color accuracy

ORBIT TRACK

- Specification grade & performance design
- Spot, narrow & flood interchangeable optics
- Industry leading lumen selectable output range

PXCYL CYLINDERS

- Elegant design with wide application use
- Five interchangeable beam angles
- Industry leading lumen selectable output up to 5,000lm

SOL TRACK HEAD

- Integrate durable track housing with upgradable LED PAR lamps
- 2-plane gimbal design
- Options of H and J type adapters

HAZARDOUS LOCATIONS

In environments where safety is paramount, selecting the right hazardous location lighting is critical. Designed to withstand harsh conditions, these luminaires provide reliable illumination in areas where flammable gases, vapors, or combustible dust may be present. With rugged construction and certified performance, our hazardous location fixtures ensure durability, compliance, and optimal visibility without compromising efficiency.

HAZARDOUS LOCATION VAPOR TIGHT HIGH BAY (HZB)

ILP

HAZARDOUS LOCATION LINEAR VAPOR TIGHT (HZV)

- Certified for hazardous locations (Class 1 Div 2, UL844)
- Durable design with high impact, water, and dust resistance (IP65-IP67, NEMA 4X)
- High efficacy up to 156 lm/W with lumen packages from 2,000–24,000

The HZB Series delivers powerful illumination for hazardous environments, built to withstand exposure to flammable gases, vapors, and combustible dust. This rugged high-bay luminaire offers a reliable one-for-one replacement for HID fixtures, maximizing efficiency with high-output LED performance and a durable, corrosion-resistant design. With multiple lumen packages, mounting options, and IP66-rated protection, it ensures superior illumination, safety, and longevity in the toughest conditions. As part of ILP's Class 1 Division 2 UL844 Listed lineup, the HZB exemplifies American-made quality, featuring industry-leading operating temperatures, exceptional efficacy, and versatile configurations for unmatched performance in demanding applications.

OUTDOOR

From gardens to parking lots, outdoor lighting applications are as diverse as the products that serve them. Outdoor lights not only offer safety and security but can also provide visual comfort. Area lights and vapor tights illuminate parking areas or corridors, while wall packs and bollards illuminate pathways and building facades.

SKYLINE AREA & FLOOD (SA/SF)

The Skyline's sleek aesthetic makes it perfectly-suited for warehouse area & flood applications. Designed for both new construction and retrofit, the Skyline provides a one-for-one solution for replacing legacy metal halide or high pressure sodium luminaires. Priced for payback, it's cost effective die-cast aluminum housings comes in 3-sizes and DLC Premium efficacies, making it the best choice for low acquisition cost and high energy savings. The highly configurable Skyline provides superior illumination, reliability, and ease of installation, exceeding most application requirements.

SKYLINE WALLPACK

- Specification Grade die-cast aluminum housing
- Available in three sizes, delivering 1,000 to 24,000 lumens at up to 150 LPW
- Quick mount bracket enables hands-free wiring and simplifies installation

NARROW LINEAR VAPOR TIGHT (WTZ)

- Sealed and gasketed vapor tight
- Durable construction for the harshest environments
- 2', 4' & 8' sizes

POLES & BRACKETS

- Straight square steel poles up to 40'
- Multiple bullhorn, wall, and wood pole mounting options
- Adapters for every site scenario

ROUND PARKING GARAGE (UFO)

- Visually comfortable illumination
- 10% uplight reduces cave effect
- Sensor & wireless controls ready

BOLLARDS (BLDT & BLFT)

- 6" flat or dome top bollards
- Value driven, quick ROI
- Multiple beam patterns
