LENS OPTIONS

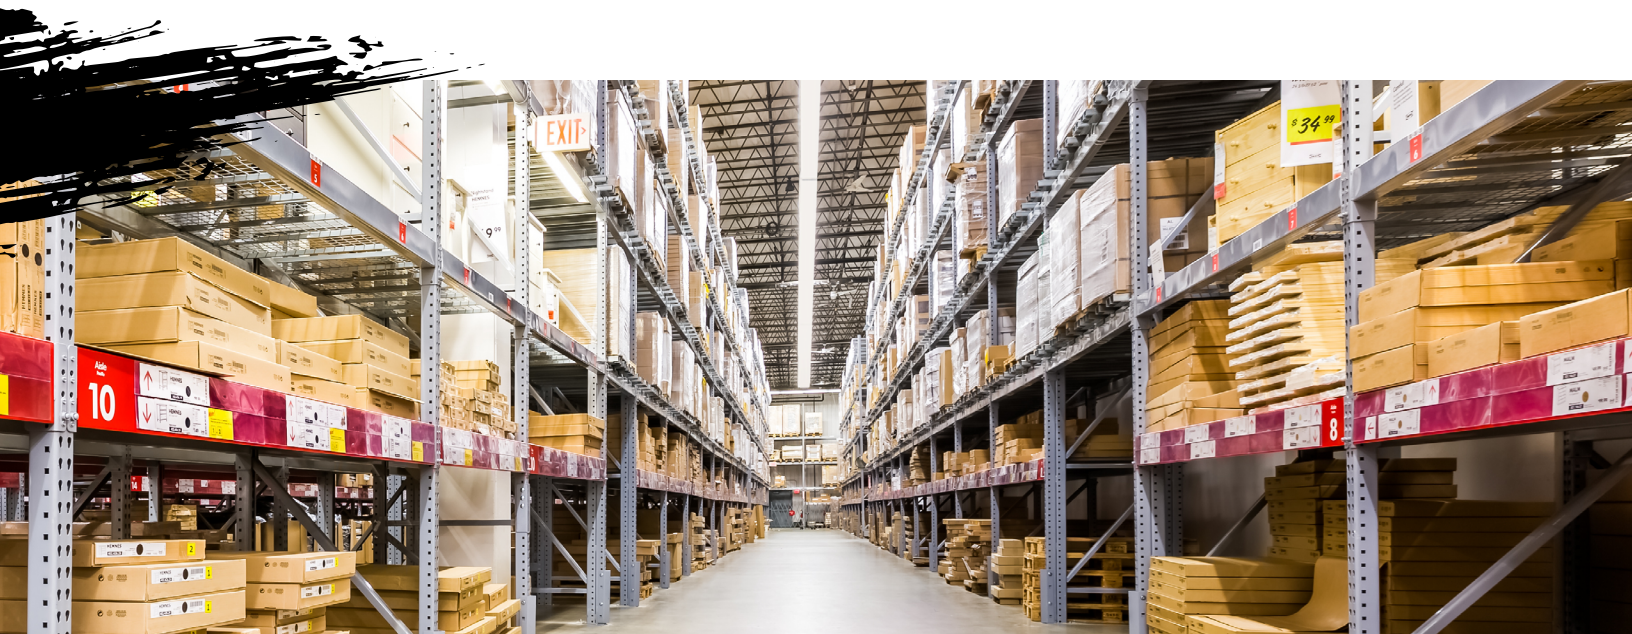

Experience the variety of VARI's options, featuring uniquely designed curved and flat frosted acrylic lenses. Enhancing both aesthetics and light distribution, these precision-engineered lenses guarantee an effective illumination experience.

FLAT LENS

CURVED LENS

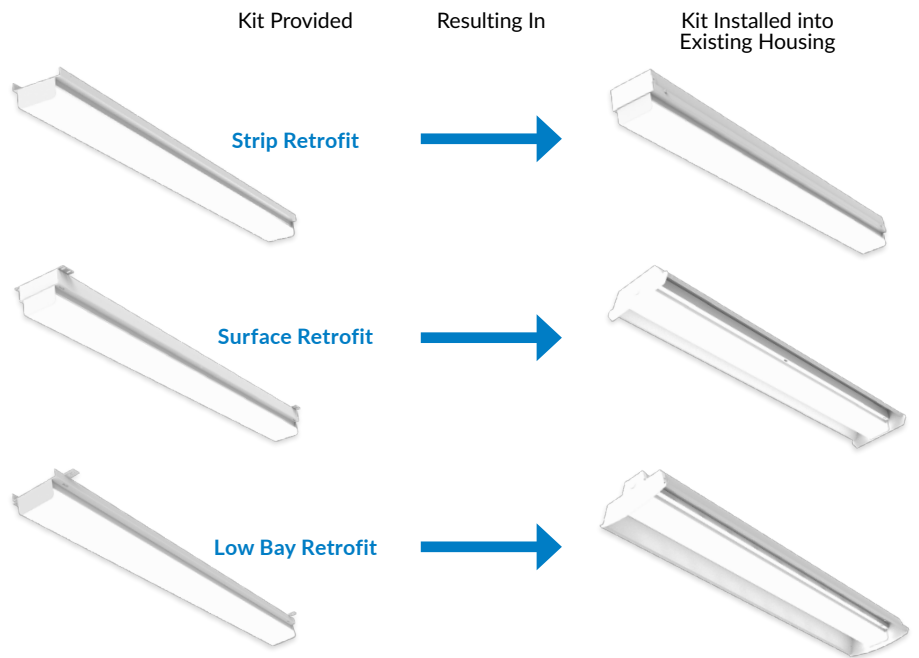

HOUSING LENGTHS & LUMEN PACKAGES

Introducing our cutting-edge linear retrofit luminaire, offering unrivaled versatility and customization. This innovative lighting solution is available in two convenient lengths: 4ft and 8ft. Moreover, it boasts a range of eight lumen packages, spanning from 2,000 to 12,000 lumens. With an elevated efficiency of up to 180 lm/W, VARI empowers you to tailor your lighting to meet the exact specifications of your space. Experience illumination like never before.

MOUNTING OPTIONS

With our fixed options of 4.3" and 5.0", you can securely install the strip retrofit lighting in a fixed position, ensuring stability and precision. For those seeking flexibility, our adjustable option ranges from 2.8" to 5.5", allowing you to easily modify the lighting angle to suit your needs. Additionally, VARI offers custom width channel options, providing a tailored solution for unique applications. To make installation hassle-free, a convenient kit is included, allowing for seamless integration into existing housing systems. Experience superior lighting customization and effortless installation with our strip retrofit lighting solution.

INNOVATIVE CONTROLS

ILP partners with leading control companies recognized for their scalable and innovative lighting solutions. By seamlessly integrating state-of-the-art software applications, sensors, and interconnected devices into our high-performance luminaires, you have full control over spaces while simultaneously reducing energy costs, improving occupant comfort, ensuring perceived safety, and more. Pairing with Integrated Wireless Grouping Controls Options allows you to maximize energy savings and further optimize your lighting system.
