VST

Volumetric Selectable Troffer

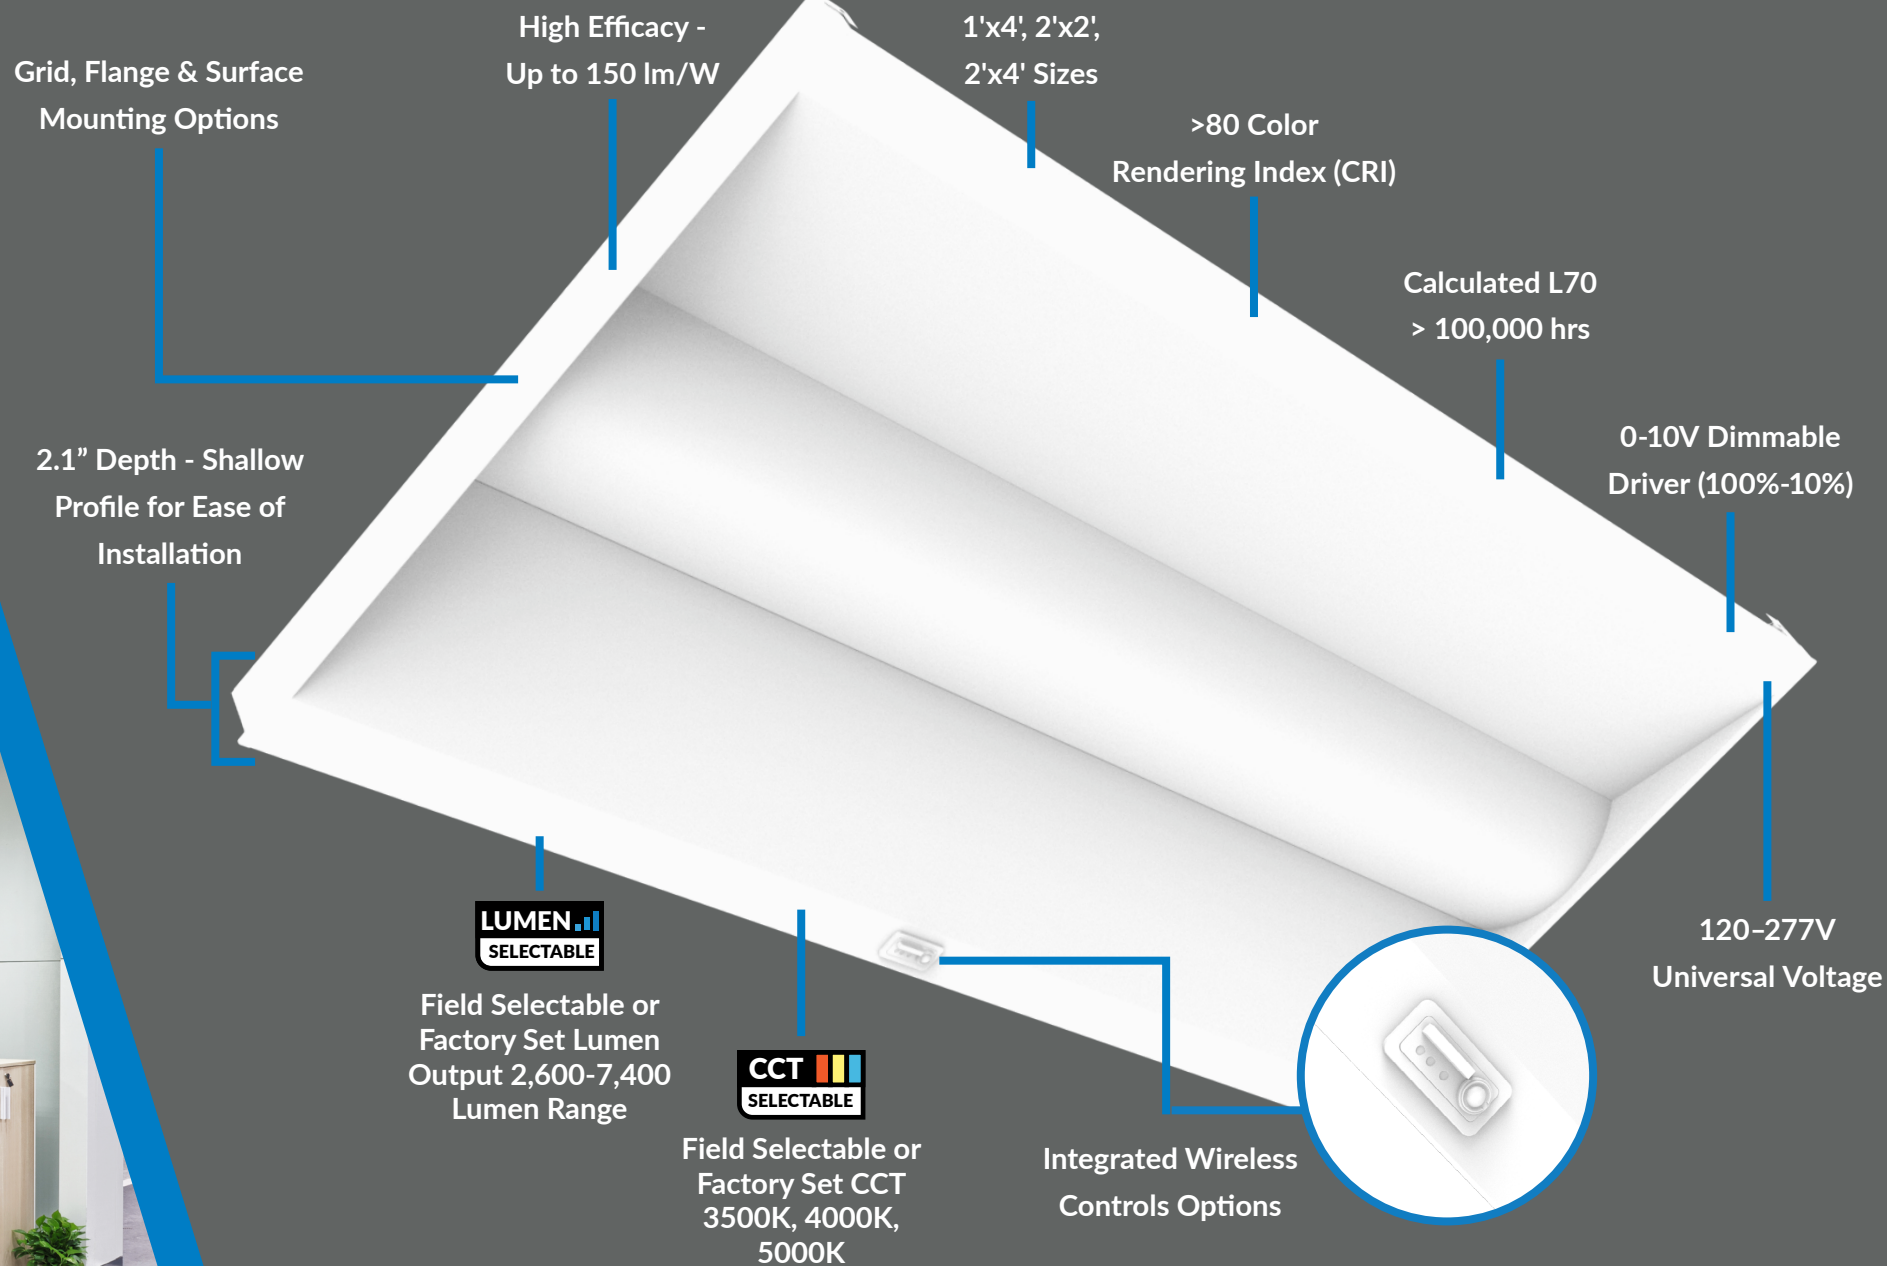

Volumetric Selectable Troffer

The VST, Volumetric Selectable Troffer, seamlessly integrates premium features with budget-friendly affordability. With both Field Selectable and Factory Set Lumen and CCT capabilities, it offers unmatched adaptability. Enhance its performance further by pairing it with a variety of control options, unlocking superior energy savings and advanced grouping features. Emphasizing a desired shallow profile, diverse sizing, and mounting options, the VST ensures an energy-efficient design. Fully selectable and embodying a sleek form, the VST stands out as the top solution for troffer applications.

FEATURES

Illuminate your space with the VST, a highly versatile Volumetric Selectable Troffer that offers a perfect blend of form and function. With its shallow lightweight design, it reduces both packaging requirements and its carbon footprint. Its highly versatile nature makes it suitable for a myriad of applications, ensuring adaptability to diverse environments.

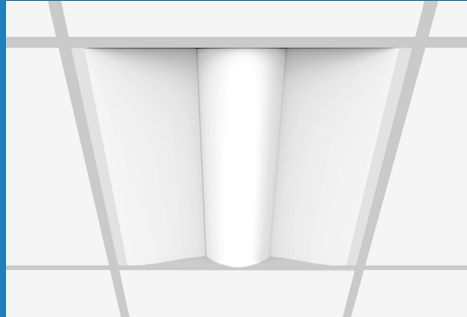

SUITABLE APPLICATIONS

Education Healthcare Commercial Office Storage Facility Retail Grocery Store

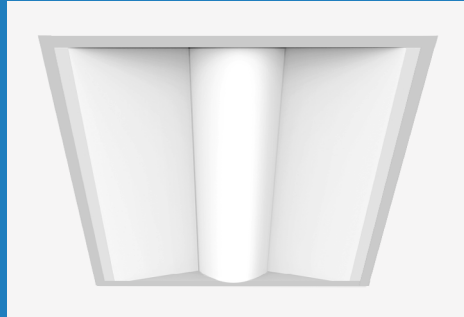

MOUNTING OPTIONS

VST offers a range of mounting options to accommodate various installation preferences and requirements. The three primary mounting options available are grid recessed, flange kit mount, and surface mount. Each option caters to different installation scenarios, providing flexibility and versatility.

SIZING OPTIONS

Tailor your lighting to perfection with VST's versatile sizing options. Choose the sleek and compact 1'x4' for a focused, space-conscious illumination. Opt for the balanced proportions of the 2'x2', striking the ideal harmony between form and function. Need broader coverage? Embrace the expansive 2'x4', providing ample light for larger spaces. VST ensures that whether you're working with a confined area or an expansive room, there's a size that perfectly suits your lighting needs.
